Remote Deposit Capture

Desktop scanner and mobile-app deposit channels for checks — same-day credit to operating accounts with duplicate-detection, image-based fraud review, and ERP integration.

DEPOSIT CHANNELS	Desktop (Panini Vision X / Digital Check TS240) · Mobile
DAILY LIMIT (DEFAULT)	\$250,000 · higher by review
MONTHLY LIMIT (DEFAULT)	\$1,000,000
PRICING	\$45 / month + \$0.12 / item
CUT-OFF (ET)	10:00 p.m. for same-day ledger credit
ORIGINAL-ITEM RETENTION	14–30 days before destruction
INTEGRATIONS	Auto-posting to Cumulus Business Checking + ERP export
SECURITY	Image encryption · dup detection · signer controls

AT A GLANCE

Overview

Remote Deposit Capture (RDC) enables a commercial client to deposit paper checks by scanning or photographing the items rather than presenting them in a branch. Scanned or photographed images are transmitted to Cumulus, where they are validated against MICR data, checked for duplicates, and presented for clearing through the Check 21 image-exchange network. The paper item remains in client custody (typically destroyed after a holding period) — credit is based on the image. Cumulus offers two RDC channels: Desktop RDC with a certified scanner for high-volume, multi-user office environments; and Mobile RDC through the Cumulus Business App for ad-hoc and field deposits.

WHY RDC

Key benefits

SAME-DAY CREDIT Same-day credit Deposits completed by 10:00 p.m. ET receive same-business-day ledger credit, with next-business-day availability on most items (Regulation CC).	ELIMINATES BRANCH TRIPS Eliminates branch trips Deposit from office or field. Especially valuable for multi-location operators, service businesses, and professional practices.
CENTRALIZED MULTI-LOCATION DEPOSITS Centralized multi-location deposits A single RDC installation at HQ can process checks collected at multiple locations (shipped overnight via secure courier), consolidating deposit control.	DUPLICATE DETECTION Duplicate detection Cumulus compares every incoming image hash against 180 days of prior RDC, mobile, branch, and ATM deposits — preventing double-posting at the source.
DEPOSIT-WORKFLOW INTEGRATION Deposit-workflow integration Auto-posting of deposits to Cumulus Business Checking with daily file export (BAI2 / camt.053) to your ERP, accounting system, or AR cash-application module.	SCANNER RENTAL OR PURCHASE Scanner rental or purchase Panini Vision X (5 / 30 / 60-items-per-minute models) and Digital Check TS240 available for purchase or monthly rental; includes PCI-DSS-compliant encryption.

SERVICE FEES

Pricing

ITEM	AMOUNT	NOTES
Monthly platform fee	\$45 / month	Per MID; includes 1 primary user + 5 secondary users
Additional users	\$5 / user / month	
Per-item fee	\$0.12 / item	Applied to each item scanned and released
Scanner — Panini Vision X I (5 ipm)	\$400 purchase · \$19 / month rental	
Scanner — Panini Vision X II (30 ipm)	\$695 purchase · \$29 / month rental	
Scanner — Digital Check TS240	\$495 purchase · \$24 / month rental	
Mobile RDC	Included in platform fee	Cumulus Business Mobile app
Returned-item fee	\$12 / item	Applied to items returned by drawee bank
Image-recall / copy request	\$2 / image	From Cumulus archive

DAILY / MONTHLY CAPS

Limits and availability

PROFILE	DAILY LIMIT	MONTHLY LIMIT	AVAILABILITY
Default small business	\$250,000	\$1,000,000	Next-business-day; up to \$5,525 same-day
Mid-market (established)	\$500,000	\$2,500,000	Same-day up to \$25,000
Enterprise	Negotiated (often \$1M+/day)	Negotiated	Per relationship; may qualify for immediate availability
Mobile RDC — default	\$100,000	\$400,000	Same per-deposit availability rules
Mobile RDC — enhanced	\$250,000	\$1,000,000	With 6+ months RDC history in good standing
Per-check maximum	\$500,000 per item	—	Items above \$500,000 recommended for teller deposit

BY VOLUME PROFILE

Service tier comparison

The chart below illustrates typical monthly RDC cost across four volume profiles, assuming a single RDC installation, one scanner rental, and \$0.12 per-item pricing. Volumes above 500 items / month typically warrant Analyzed Checking ECR-offset pricing to reduce effective cost.

Typical monthly RDC cost (platform + scanner + per-item)

HOW IT WORKS

Deposit workflow

STEP	ACTIVITY	TIMING
1 · Prepare	Endorse items 'For deposit only to Cumulus account #####.' Stack in feeder or capture individually on mobile.	Any time
2 · Scan / capture	Scanner (or mobile app) captures front and back images and MICR line. Image quality assessment (IQA) confirms read quality.	Real-time
3 · Review	Review itemized deposit total; correct any items with amount-read errors; remove any rejected items.	Real-time
4 · Release	Submit deposit file to Cumulus. Cumulus performs duplicate detection across all channels (RDC, mobile, ATM, teller for 180 days).	Seconds
5 · Ledger credit	Funds ledgered to the operating account same-day if submitted by 10:00 p.m. ET; otherwise next business day.	Same business day
6 · Clearing	Cumulus transmits image through Check 21 image-exchange network to drawee bank for settlement.	1–2 business days
7 · Retention and destruction	Client retains original paper items in secure custody for 14–30 days (per service schedule) and then destroys.	14–30 days

IMAGE AND FRAUD PROTECTION

Security and controls

- **Image encryption** — all images encrypted in transit (TLS 1.3) and at rest (AES-256) with key management per FIPS 140-3 validated modules.
- **Duplicate detection** — 180-day lookback against RDC, mobile, ATM, branch, and night-drop deposits across all Cumulus channels.

- **User entitlements** — role-based: scanner operator, reviewer, releaser, administrator. Segregation of scan and release for larger organizations.
- **Image-quality analysis (IQA)** — automatic IQA flags low-contrast, skewed, or uncovered items at scan; released images that fail downstream IQA return in standard fashion.
- **MICR validation** — MICR line parsed and validated against ABA routing-number directory and amount/serial-number format rules.
- **Audit trail** — every scan, review, release, and rejection logged with user ID, timestamp, and IP; exportable for internal audit.

CHECK 21 COMPLIANCE

Original-item retention and destruction

REQUIRED HOLDING PERIOD

Cumulus service schedule specifies a 14–30 day holding period during which the client retains the original paper item in secure custody. After the holding period, the item must be destroyed by cross-cut shredder or other commercially reasonable means; Cumulus recommends documented destruction logs. Destruction prevents secondary presentment — the most common RDC-related fraud risk.

COMMON QUESTIONS

Frequently asked questions

How quickly are deposited funds available?

Regulation CC typically provides next-business-day availability for most check deposits with an on-us same-day carve-out up to \$5,525 (\$2,225 for longer-term customers). Mid-market and enterprise clients may qualify for immediate availability on in-relationship items through their Relationship Manager.

What if a deposited item is returned?

Returned items (insufficient funds, stop payment, altered) debit the originating account with a \$12 returned-item fee. Client is responsible for re-presenting through Cumulus or pursuing independent collection from the maker. A returned item may be redeposited by RDC; Cumulus recommends a single redeposit attempt only.

Can I mobile-deposit a check after RDC-depositing the same item?

No. Duplicate detection flags any check image already deposited within 180 days across any Cumulus channel — RDC, mobile, ATM, or teller. The second deposit will be rejected and both images surfaced for review.

What scanner should I buy?

For offices depositing 5–20 items per day, the Panini Vision X I (5 items/minute) or Digital Check TS240 is cost-effective. For higher volumes (50+ items per day or multi-location aggregation), the Panini Vision X II (30 ipm) provides throughput. Your Relationship Manager will recommend based on volume.

How long do I keep the original checks?

Per Cumulus service schedule: 14 days for small-business RDC; 30 days for mid-market and enterprise RDC. During the holding period, items must be in secure custody (locked cabinet minimum). After the holding period, commercially reasonable destruction (cross-cut shredding) is required.

Can I use RDC for cashier's checks and money orders?

Yes. RDC accepts all legally-deposit-eligible items: personal checks, business checks, cashier's checks, and money orders. Traveler's checks, foreign-currency checks, and foreign-drawn items must be deposited in-branch for proper handling.

DISCLOSURES & REGULATORY NOTICES

Important disclosures

§ Remote Deposit Capture services are provided by Cumulus Bank, N.A. under the Treasury Services Master Agreement, applicable service schedule, the Check Clearing for the 21st Century Act (Check 21, 12 U.S.C. § 5001 et seq.), and Regulation CC (12 C.F.R. Part 229).

§ Client retains original paper items in a secure location for a period set in the service schedule (typically 14–30 days) before destruction. Cumulus is not responsible for losses arising from improper destruction, secondary-presentment fraud on non-destroyed items, or failure to maintain secure custody of images.

§ Duplicate-presentment detection uses image hashing and cross-channel matching but cannot guarantee every duplicate is detected. Clients remain liable for duplicate items presented through RDC and an alternate channel.

§ Mobile deposit limits apply at the deposit level and in aggregate per day and per month. Limits are subject to Cumulus risk review; increases available on request with qualifying history.

ENGAGE A SPECIALIST

Connect with a Cumulus commercial banker

A Commercial Relationship Manager will assess your business's banking, credit, and treasury needs, coordinate supporting specialists, and return a term sheet or proposal on an expedited timeline. Existing Cumulus clients should contact their dedicated Relationship Manager directly.
