

Commercial Treasury Readiness Brief

A specialist brief that turns operating signals into a treasury-services readiness view with implementation blockers and recommended discussion points.

DOCUMENT TYPE	Treasury readiness brief
AUDIENCE	Treasury specialist and relationship manager
OWNER	Treasury management officer
CADENCE	Before treasury proposal or implementation

RELATIONSHIP FRAME

Customer context

Use this before a treasury proposal, implementation call, or renewal conversation with a business customer.

Commercial Treasury Readiness Brief is designed for treasury specialist and relationship manager use during the before treasury proposal or implementation motion. The document should orient the owner, clarify the current relationship frame, and convert scattered signals into a practical plan that can be reviewed before customer contact.

The core content emphasizes cash-cycle indicators, service fit, implementation blockers. These areas are intentionally operational: they help the treasury management officer understand what is known, what still needs validation, and which follow-up steps should be assigned before the relationship moves forward.

The document is not an automated decision record. It is a generated working draft that should be checked against the system of record, then refined by the banker, advisor, service specialist, or implementation owner who is accountable for the relationship.

Working posture Use this as a content-heavy planning document. It is meant to collect context, evidence, actions, and controls in one place before the owner decides what should become customer-facing language.

Field	Value
Service scope	ACH, wires, positive pay, lockbox, RDC, cards, and sweeps
Primary objective	Identify readiness gaps and implementation priorities
Review posture	Specialist preparation document
Next milestone	Treasury proposal or implementation plan

WHAT THIS PRODUCES

Document highlights

Cash-cycle indicators Frames receivables, payables, fraud risk, and liquidity movement.	Service fit Maps business needs to treasury capabilities for discussion.
Implementation blockers Surfaces approvals, file formats, testing, and user-administration gaps.	Risk controls Keeps fraud prevention and dual control visible.

Discussion guide

Topic	Why it matters	Review prompt
Cash-cycle indicators	Frames receivables, payables, fraud risk, and liquidity movement.	Confirm whether this should be included in the next customer or team conversation.
Service fit	Maps business needs to treasury capabilities for discussion.	Confirm whether this should be included in the next customer or team conversation.
Implementation blockers	Surfaces approvals, file formats, testing, and user-administration gaps.	Confirm whether this should be included in the next customer or team conversation.
Risk controls	Keeps fraud prevention and dual control visible.	Confirm whether this should be included in the next customer or team conversation.

GENERATED SCORECARD

Readiness signals

How to interpret these signals

Signal	Posture	Interpretation
Receivables fit (71%)	Developing signal	lockbox or RDC likely. Useful for planning and prioritization; review supporting evidence before acting.
Payables fit (69%)	Developing signal	ACH and wire review. Useful for planning and prioritization; review supporting evidence before acting.
Fraud-control need (82%)	Strong signal	positive pay conversation. Can anchor the conversation, but still requires source validation.
Implementation effort (57%)	Developing signal	moderate. Useful for planning and prioritization; review supporting evidence before acting.

SOURCE REVIEW

Evidence model

Source	Signals
CRM	Products, opportunities, contacts, and implementation tasks
Treasury usage	ACH, wire, card, RDC, lockbox, and fraud-control indicators
External enrichment	Industry, size, location, and operating-risk signals

Source	Expected content	Validation step
CRM	Products, opportunities, contacts, and implementation tasks	Validate freshness, owner, and field-level trust before reuse.
Treasury usage	ACH, wire, card, RDC, lockbox, and fraud-control indicators	Validate freshness, owner, and field-level trust before reuse.
External enrichment	Industry, size, location, and operating-risk signals	Validate freshness, owner, and field-level trust before reuse.
Human review	Treasury management officer	Required before customer-facing delivery or CRM task creation.

RECOMMENDED WORKFLOW

Action plan

Timing	Action	Owner
Before proposal	Confirm volumes, file needs, approvers, and target services.	TMO
Proposal	Present services, controls, implementation timeline, and pricing assumptions.	TMO
Implementation	Coordinate testing, user setup, limits, and go-live support.	Treasury implementation

Operating notes

Before proposal: TMO should confirm volumes, file needs, approvers, and target services. The owner should record the outcome in the CRM activity timeline and identify any dependency that blocks the next step.

Proposal: TMO should present services, controls, implementation timeline, and pricing assumptions. The owner should record the outcome in the CRM activity timeline and identify any dependency that blocks the next step.

Implementation: Treasury implementation should coordinate testing, user setup, limits, and go-live support. The owner should record the outcome in the CRM activity timeline and identify any dependency that blocks the next step.

REVIEW BEFORE USE

Controls

- Pricing, limits, and availability require treasury approval.
- Do not expose account-level transaction details in broad meeting materials.
- Validate implementation assumptions with operations before committing dates.

Review checklist

Check	Required review
Data freshness	Confirm the data was refreshed recently enough for the customer workflow.
Sensitive information	Mask identifiers, credentials, account numbers, and private notes.
Human approval	Route customer-facing excerpts through the owner and approved template process.
CRM update	Log decisions, declined actions, follow-up tasks, and unresolved questions.

DEMO GUARDRAILS

Disclosures and controls

This document is generated for the JDO demo environment using fictitious Cumulus Bank data. Information is illustrative, may be synthesized, and must be verified before any real customer communication. No credit, investment, insurance, tax, legal, or fiduciary recommendation is made by this generated document. Demo asset. Fictitious customer data. Not for production customer communications.

DOCUMENT METADATA

Appendix

Field	Value
Document code	CD-COM-TREASURY
Document type	Treasury readiness brief
Audience	Treasury specialist and relationship manager
Owner role	Treasury management officer
Cadence	Before treasury proposal or implementation
Segment	Commercial
Generated output	documents/03_Service_and_Retention/Cumulus_Commercial_Treasury_Readiness_Brief.pdf

This appendix exists so generated PDFs can be checked back to their source spec, folder, owner model, and usage cadence during demos or document QA.

Align the relationship team

Use this document to coordinate treasury, lending, service, and relationship-management actions for business customers.
