

# Wealth Planning Next Steps

*A focused next-steps document for planning gaps, customer homework, internal owners, and sequencing after a wealth planning conversation.*

|               |                                           |
|---------------|-------------------------------------------|
| DOCUMENT TYPE | Planning next steps                       |
| AUDIENCE      | Advisor team                              |
| OWNER         | Planning specialist                       |
| CADENCE       | After planning review or major life event |

RELATIONSHIP FRAME

## Customer context

Use this after a major life event, estate planning discussion, retirement review, or complex planning meeting.

Wealth Planning Next Steps is designed for advisor team use during the after planning review or major life event motion. The document should orient the owner, clarify the current relationship frame, and convert scattered signals into a practical plan that can be reviewed before customer contact.

The core content emphasizes task sequencing, document needs, decision dependencies. These areas are intentionally operational: they help the planning specialist understand what is known, what still needs validation, and which follow-up steps should be assigned before the relationship moves forward.

The document is not an automated decision record. It is a generated working draft that should be checked against the system of record, then refined by the banker, advisor, service specialist, or implementation owner who is accountable for the relationship.

**Working posture**

Use this as a content-heavy planning document. It is meant to collect context, evidence, actions, and controls in one place before the owner decides what should become customer-facing language.

| Field             | Value                                                                          |
|-------------------|--------------------------------------------------------------------------------|
| Trigger           | Planning review, liquidity event, inheritance, retirement, or family milestone |
| Primary objective | Turn planning topics into ordered tasks                                        |
| Delivery posture  | Internal advisor workflow with customer-facing excerpts                        |
| Next milestone    | Completed document package and updated plan assumptions                        |

WHAT THIS PRODUCES

|------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|
| <b>Task sequencing</b><br>Groups planning actions by customer, advisor, and specialist owner.        | <b>Document needs</b><br>Identifies statements, estate documents, insurance schedules, or business records. |
| <b>Decision dependencies</b><br>Shows which tasks need completion before proposal or implementation. | <b>Retention context</b><br>Keeps complex planning work visible across the team.                            |

Discussion guide

| Topic                 | Why it matters                                                                     | Review prompt                                                                      |
|-----------------------|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| Task sequencing       | Groups planning actions by customer, advisor, and specialist owner.                | Confirm whether this should be included in the next customer or team conversation. |
| Document needs        | Identifies statements, estate documents, insurance schedules, or business records. | Confirm whether this should be included in the next customer or team conversation. |
| Decision dependencies | Shows which tasks need completion before proposal or implementation.               | Confirm whether this should be included in the next customer or team conversation. |
| Retention context     | Keeps complex planning work visible across the team.                               | Confirm whether this should be included in the next customer or team conversation. |

GENERATED SCORECARD

Readiness signals

How to interpret these signals

| Signal                     | Posture           | Interpretation                                                                                         |
|----------------------------|-------------------|--------------------------------------------------------------------------------------------------------|
| Document readiness (42%)   | Needs review      | material gaps. Treat as a gap or risk indicator until the owner confirms the underlying data.          |
| Specialist alignment (66%) | Developing signal | trust review needed. Useful for planning and prioritization; review supporting evidence before acting. |
| Timeline clarity (74%)     | Developing signal | owners assigned. Useful for planning and prioritization; review supporting evidence before acting.     |

SOURCE REVIEW

Evidence model

| Source         | Signals                                                             |
|----------------|---------------------------------------------------------------------|
| CRM activity   | Meeting notes, tasks, open opportunities, and planning topics       |
| Customer files | Statements, trust documents, tax summaries, and insurance schedules |
| Advisor input  | Reviewed assumptions and approved language                          |

| Source         | Expected content                                                    | Validation step                                                |
|----------------|---------------------------------------------------------------------|----------------------------------------------------------------|
| CRM activity   | Meeting notes, tasks, open opportunities, and planning topics       | Validate freshness, owner, and field-level trust before reuse. |
| Customer files | Statements, trust documents, tax summaries, and insurance schedules | Validate freshness, owner, and field-level trust before reuse. |
| Advisor input  | Reviewed assumptions and approved language                          | Validate freshness, owner, and field-level trust before reuse. |
| Human review   | Planning specialist                                                 | Required before customer-facing delivery or CRM task creation. |

RECOMMENDED WORKFLOW

# Action plan

| Timing | Action                                                             | Owner               |
|--------|--------------------------------------------------------------------|---------------------|
| Week 1 | Collect planning documents and confirm external advisor contacts.  | Planning specialist |
| Week 2 | Review assumptions with trust, lending, or tax partners as needed. | Advisor team        |
| Week 3 | Present next-step plan and capture client decisions.               | Lead advisor        |

## Operating notes

Week 1: Planning specialist should collect planning documents and confirm external advisor contacts. The owner should record the outcome in the CRM activity timeline and identify any dependency that blocks the next step.

Week 2: Advisor team should review assumptions with trust, lending, or tax partners as needed. The owner should record the outcome in the CRM activity timeline and identify any dependency that blocks the next step.

Week 3: Lead advisor should present next-step plan and capture client decisions. The owner should record the outcome in the CRM activity timeline and identify any dependency that blocks the next step.

REVIEW BEFORE USE

# Controls

- Do not summarize legal documents without specialist review.
- Separate customer homework from internal advisory tasks.
- Use approved channels for any document collection request.

## Review checklist

| Check                 | Required review                                                                 |
|-----------------------|---------------------------------------------------------------------------------|
| Data freshness        | Confirm the data was refreshed recently enough for the customer workflow.       |
| Sensitive information | Mask identifiers, credentials, account numbers, and private notes.              |
| Human approval        | Route customer-facing excerpts through the owner and approved template process. |
| CRM update            | Log decisions, declined actions, follow-up tasks, and unresolved questions.     |

DEMO GUARDRAILS

# Disclosures and controls

This document is generated for the JDO demo environment using fictitious Cumulus Bank data. Information is illustrative, may be synthesized, and must be verified before any real customer communication. No credit, investment, insurance, tax, legal, or fiduciary recommendation is made by this generated document. Demo asset. Fictitious customer data. Not for production customer communications.
